ABOUT US

Family owned and operated since 1964, Precision Walls, Inc. has been committed to providing premier specialty construction services and products to commercial and residential customers in North Carolina, South Carolina, Tennessee and the Southeast. Precision Walls is consistently ranked in the top 10 wall and ceilings contractors in the U.S. as recognized by ENR (*Engineering News-Record*).

For nearly half a century, general contractors, architects, facility managers and owners have relied on Precision Walls to be their trusted partner. We have the commitment and resources to be an integral part of your team. **Our Passion is building strong customer relationships and being the partner that helps drive your job.**

UNPARALLELED COMMITMENT TO SAFETY, QUALITY AND SERVICE.

Precision Walls' commitment to safety, quality and customer service has made us the southeast's premier wall and ceiling expert, offering a wide range of products and commercial construction services. We have the best and highest trained people in the industry committed to delivering the ultimate level of customer service. We utilize the highest quality products and adhere to the strictest performance standards ensuring a world class finished product.

SAFETY - Safety is a priority on each and every job, large or small. We designed our Safety program with help and guidance from OSHA. It involves every employee in the organization, and includes a proactive strategy to detect and eliminate workplace hazards. The Safety program is based on "target zero incidents" and a "drug-free workplace." It emphasizes prevention and doing whatever is necessary to ensure accidents never happen on project sites. Precision Walls is focused on making sure every employee can return home safely to his or her family at the end of each working day. Our award-winning Safety program and recognition thereof is proof of our commitment.

QUALITY ASSURANCE - Our 100% Commitment to Quality Work. Precision Walls has on-site supervision on every job to implement Quality Assurance procedures. This commitment ensures work is performed in accordance with the project's plans, schedule and specifications. Our goal is to facilitate a productive and error-free installation by utilizing a comprehensive Quality Assurance Plan that is specific for each job. This helps to ensure quality work while creating the opportunity to beat schedules rather than just meet them.

WE DO WHAT WE SAY WE ARE GOING TO DO. We are an experienced, well trained team that is willing to go to any length to get the job done right. With the majority of our employees having decades of construction experience, we can handle jobs of any complexity. There is truly no job too large or too small for Precision Walls. We are a reliable solution provider and will endeavor to make your job easier. We have the willingness to take on the tough jobs and the tenacity to see them through. It is our daily goal to exceed your expectations.

SUSTAINABILITY - At Precision Walls we are committed to doing our part to lessen the environmental impact of our business and our products. We have the experience to provide Leadership in Energy and Environmental Design (LEED) and Lean Initiatives throughout the preconstruction and construction processes of our projects. This knowledge provides reassurance that projects are designed and constructed utilizing techniques and resources that improve energy and production efficiency while reducing environmental impact. We support LEED and Lean Programming for the benefit of the built environment and boast an impressive portfolio of successful projects.
