

Draper Projection Screens

Precision Walls, Inc. is proud to be the regional dealer for Draper, Inc. Draper has been manufacturing the highest quality projection screens in the industry since 1902. With one of the most comprehensive product lines in the world, we have a projection screen for every need! From manually to electrically operated, front or rear projection, Draper has a projection screen to accommodate your facility. As with Precision Walls, Inc., Draper's first concern is delivering a quality product to each and every customer. Every screen is manually inspected for quality and accuracy before it leaves their factory. Our skilled installation technicians are factory trained in the latest technologies to ensure that your Draper, Inc. projection screen performs as it is intended. Draper is the industry leader in the development of rigid rear projection screens and only Draper can provide four unique technologies to satisfy any requirements: IRUS, Cinescreen, Vortex and Diamondscren.

Types of Screens available:

Electric Screens — whether you need a wall mounted, ceiling mounted, ceiling recessed, tab-tensioned or non-tab tensioned, Draper has the right screen for your application. Combine the perfect screen with the perfect control option and you have a quality product that delivers quality and performance.

Manual Screens —with a broad selection of mounting options and the quality of our individually inspected screens you can't go wrong choosing a Draper screen.

Rear Screens — Draper offers rigid rear screens as well as portable models- home theatre, rear projection systems for business applications, Video Wall framing systems, and Projector Support Structures.

Fixed Screens - permanently tensioned screens that provide a contemporary, theatre-like appearance wherever a permanently mounted front or rear projection screen is required. The viewing surface is flat and that means perfect picture quality.
