# FABRIPRINT™

THE POWER OF DIGITAL ART; THE STRENGTH OF ACOUSTICS

Custom art printed on FabriSPAN® Premium fabric and installed with FabriTRAK wall system trak and infill.

## Custom printed acoustic art panels

**FabriPRINT™** by FabriTRAK® Systems Inc is a unique product that effectively combines acoustic performance and artistic imagery, transforming an acoustic wall or ceiling into a work of art, and art works into a beautiful sound solution. **FabriPRINT™** is available in both **FabriART™** and **FabriPATTERN™** solutions. **FabriART™** is a unique art installation – whereby art is printed on fabric. **FabriPATTERN™** incorporates a repeated image printed on fabric and installed to achieve a continuous look in a space. **FabriPRINT™** may be applied to curved or straight walls and ceilings, all benefiting from enhanced acoustic performance.

## Exceptional Design for Every Taste

With limitless design opportunities, including classic and contemporary art, photography, corporate and sports team logos, commissioned projects or repeated patterns, **FabriPRINT™** provides the perfect solution to acoustic problems. **FabriPRINT™** is currently available on a variety of our FabriSPAN® fabrics for either **FabriART™** or **FabriPATTERN™** projects.

## Add an artistic touch

Art can work to stimulate creativity, engage the community, encourage action and enhance the atmosphere. Good design communicates the sense of space, how it looks as well as how it sounds. Whether digital graffiti art on fabric or the company logo, make the space 'sound' like you. The seamless look of our acoustic art panels allows the perfect blend of creativity and purpose to any business or residence.

## Maximize the sound potential and artistic creativity

Designers are afforded the flexibility to showcase photographers, artists and themes – such as logos, seasonal décor or trending color palates. **FabriART™** and **FabriPATTERN™** panels can also delineate space and highlight public and private areas in a subtle and attractive way.

## Custom Art Properties and Values

WIDTH	10' WIDE WIDTH FABRICS AVAILABLE	FabriSPAN® Classic, Flex, Premium, Stretch, Weave, Waterfall

\* Test values include FabriTRAK, infill and printed fabric. ASTM Tests available on [www.fabritrak.com](http://www.fabritrak.com).

# FABRIART™

SOUND PERFORMANCE NEVER LOOKED SO GOOD

Custom ceiling art printed on FabriSPAN® Premium fabric.

## Combining art and function

Interior designers seek to evoke a sense of uniqueness to spaces – all while bringing in a specific look, such as fine art, a corporate or team logo, digital photography or graffiti, or bespoke art designs. **FabriART™** is available on a range of wide width (10') and ultra-wide width (16') fabrics and can be used with the FabriTRAK® wall and ceiling trak system or the environmentally-friendly non-PVC GeoTRAK® system.

## Create a custom look with superior sound absorption

**FabriART™** transforms not only the perception of a space, but the sound within the space. The fabric printing does not deter from the acoustical qualities of the trak system. When the printed fabric is installed with the infill and trak, the noise reduction and sound absorption work as effectively as any non-printed fabric. **The art sounds as good as it looks.**

## Communicate the space through art

**FabriART™** allows the **artist** to translate any creative image into an acoustical art panel for an interior space.

**FabriART™** enables the **interior designer** to achieve maximum creativity in creating a sense of space and incorporate images into interiors while considering sound and noise control.

**FabriART™** provides the **client** a sound space that shows off their style, whether incorporating a company logo, commissioned art piece or personal photography on a wall or ceiling.

- ✓ Retail
- ✓ Entertainment venues
- ✓ Sports arenas
- ✓ Residential
- ✓ Cultural spaces
- ✓ Houses of Worship

# FABRIPATTERN™

SUPERB ACOUSTICS, CUSTOM DESIGN

## Attractive Sound Management

**FabriPATTERN™** achieves both style and beauty with a keen sensitivity to how a space should sound - even in the most challenging environments.

## Create your own individual look

Patterns give space not only a sense of consistency but also a sense of unity. Interior Designers will use a repeating pattern to create a cohesive feel on walls and ceilings to define a space. **FabriPATTERN™** helps to delineate specific spaces, such as corporate work zones, dining areas in restaurants, or meeting places in public areas.

Patterns can be as interesting or as subtle as the space calls for. Pattern changes on a wall or ceiling fabric can help create a calming atmosphere as well. **FabriPATTERN™** may also be used to repeat a corporate or team logo in a large venue, can become an artistic feature in a retail space, or stand out as a feature wall in a residence.

## Acoustic solutions without compromising design

When using **FabriPATTERN™** on a FabriTRAK® or GeoTRAK® system, incorporating both trak and infill, an artistic statement is made while meeting the highest ratings of acoustics.

## Enhance the interior space

**FabriPATTERN™** works on a range of fabrics such as FabriSPAN®'s wide width (10') and ultra-wide width (16') fabrics. As with **FabriART™**, the printing on the fabric for **FabriPATTERN™** does not deter from the acoustic ratings.

## Designers Suggest:

- ✓ Professional spaces

- ✓ Entertainment venues
- ✓ Sports arenas
- ✓ Residential
- ✓ Cultural spaces
- ✓ Houses of Worship

Custom art on FabriSPAN® Premium fabric and installed with FabriTRAK wall system trak and infill.

## How Art is Installed

### Functional | Aesthetic | Changeable

When adding **FabriART™** or **FabriPATTERN™** to a space, FabriTRAK® wall or heavy-duty ceiling trak, or GeoTRAK® is installed to the substrate and infill is added to enhance the acoustics.

The printed fabric is then added by tucking and locking it into the trak system, resulting in an interior finish that combines custom high-end design with acoustics.

The beautiful look of an acoustic art installation does not have to be permanent. The FabriTRAK® system is designed to easily change the fabric as desired.
